

## Press release

### LEUKOCARE launches comprehensive website update

*LEUKOCARE is pleased to announce the comprehensive update of its fully-featured website [www.leukocare.com](http://www.leukocare.com), allowing richer insights into LEUKOCARE's Stabilizing and Protecting Solutions (SPS<sup>®</sup>) formulation technology platform. Visitors are invited to explore new contents and scientific data concerning the stabilization of antibodies, lyophilisation of live viruses, provided services and offered analytical methods.*

---

**Munich, Germany, March 09, 2016**

The Munich-based biotech company LEUKOCARE was able to generate new scientific data in the course of ongoing development projects which is now made available on LEUKOCARE's fully updated website. This data includes new figures concerning the successful stabilization of antibodies in liquid formulation and the protection of live viruses during lyophilisation and storage by LEUKOCARE's proprietary Stabilizing and Protecting Solutions (SPS<sup>®</sup>) formulation technologies. Furthermore, now the website provides an instant overview of LEUKOCARE's formulation services and new analytical methods to assess molecular properties for an even more successful formulation development. LEUKOCARE provides a next-generation formulation platform for the protection of biologics to allow the development of better products. The SPS<sup>®</sup> formulation technologies are provided to development projects of partners in the pharmaceutical and medical device industry.

"As our clients are usually challenged by complex and diverse questions in product development and the need for specific solutions and as we are continuously expanding our business activities, it is important that our website provides a comprehensive overview of the potential of our SPS<sup>®</sup> technologies. With our dedicated analytical methods and specialized services, we meet our customer's specific needs", commented Roland Derwand, Vice President Scientific Medical Marketing & Sales.

Indeed the expansion of LEUKOCARE's business activities shows how important an informative and intuitive website providing the most recent development achievements is. "LEUKOCARE offers specialized formulation

technologies for our customer's ever-changing and challenging environment, thus offering innovative, cutting-edge solutions for industry's current needs is a major driver of our sustained success", added Michael Scholl, Chief Executive Officer of LEUKOCARE.

### **About LEUKOCARE**

LEUKOCARE provides a next-generation formulation technology platform for the protection of proteins like biopharmaceuticals to allow the development of better products. The proprietary Stabilizing and Protecting Solutions (SPS<sup>®</sup>) formulation technologies are provided to development projects of partners in the pharmaceutical and medical device industry. LEUKOCARE's SPS<sup>®</sup> technologies improve stability and quality of biologics like antibodies, vaccines etc. in dry and liquid formulation and protect proteins in biologically functionalized combination devices.

LEUKOCARE is a privately owned biotechnology company founded in 2003 and headquartered in Martinsried/Munich, Germany. LEUKOCARE is currently involved in more than 15 collaborations with industrial partners.
